SAFETY DATA SHEET

Anchor Seal, Inc.  EPOXY HARDENER

1. Identification

1.1 Product Name: SY5233FR (YR9) (Part B)
1.2 Recommended Use: Adhesive, coating, casting, tooling, potting & encapsulation.
Issue Date: 1/28/14
Supersedes 10/15/12
Reason for revision: New format
1.3 Manufacturer:
ANCHOR-SEAL, INC.
54 Great Republic Drive
Gloucester, MA 01930
Tel. 978-515-6004
Email: sales@anchorseal.com

1.4 In Case of Emergency: INFOTRAC: 1-800-535-5053
Outside the US and Canada, Call 1-352-323-3500

2. Hazards Identification

2.1 OSHA/HCS status: This material is classified as Hazardous under OSHA Hazard
Classification: DANGER! Causes severe eye and skin burns. May cause sensitization by skin
contact. Risk of serious damage to the eyes. Harmful if swallowed. Causes burns of the mouth
and throat. May be harmful to aquatic organisms, may cause long-term adverse effects in the
aquatic environment.
Skin contact: Harmful in contact with the skin. Brief contact may cause skin burns. Severely
irritating to the skin. May cause skin sensitization or an allergic reaction which becomes evident on
re-exposure to this material.
Eye contact: Severely irritating to the eyes. May cause irreversible damage including blindness.
Chemical burns may occur.
Ingestion: Low toxicity if swallowed. Swallowing may result in burns of the mouth and throat.
Inhalation: Toxic if inhaled. Severely irritating to the respiratory system. Repeated inhalation may
cause lung damage. May cause lung sensitization, an allergic reaction, which becomes evident on re-
exposure to this material. Exposure can produce sensorimotor effects.
2.1 cont.
Classification according to EC No. 1272/2008 (CLP/GHS)

Health Hazard statements:

**Skin Irritation**
H312  Harmful in contact with the skin.
    H314, H315  Causes severe skin burns. Causes skin irritation.
    H317  May cause an allergic skin reaction and sensitization.

**Eye Irritation**
H318  Causes serious eye damage.
    H319  Causes serious eye irritation.

**Inhalation**
H331  Toxic if inhaled.
    H334  May cause allergy or asthma symptoms or breathing difficulties if inhaled.
    H335  May cause respiratory irritation.
    H336  May cause drowsiness or dizziness

**Oral Toxicity**
H302  Harmful if swallowed.

**Aquatic**
H412   Harmful to aquatic life with long lasting effects.

**Xi Irritant**
R36/38, R43

**N**
R51/53

2.2 Label Elements

Hazard pictograms:

![Signal word: Warning](image1)
![Signal word: Warning](image2)
![Signal word: Warning](image3)

2.3 Precautionary statements:

P261 Avoid breathing dust/fume/gas/mist/vapors/spray
P264 Wash thoroughly after handling.
P273 Avoid release to the environment.
P280 Wear eye protection / face protection, protective gloves & clothing.
P284 In case of inadequate ventilation, wear respiratory protection.
P302 + P352 **IF ON SKIN:** Wash immediately with plenty of soap and water.
P333 + P313 If skin irritation or rash occurs: Get medical advice / attention.

See toxicological information (Section 11)

**GENERAL INFORMATION:** Read the entire SDS for a more thorough evaluation of the hazard

4. First aid response measures

4.1 **Eye contact:** Check for and remove any contact lenses. Immediately flush eyes with plenty of running tepid water for 15 minutes, occasionally lifting the upper and lower eyelids. If effects occur get medical attention as appropriate.
- **Skin contact:** Wash immediately with warm soapy water. Remove contaminated clothing. Get medical attention if irritation develops. Discard clothing or personal items that cannot be decontaminated.
- **Inhalation:** Move exposed person to fresh air and keep comfortable for breathing.
  If not breathing or if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen clothing such as collar, tie, belt or waistband.
- **Ingestion:** Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

4.2 **Symptoms of exposure:**
- **Eye contact:** Irritation and redness, watering, pain.
- **Skin contact:** Irritation, redness, itching.
- **Inhalation:** Coughing, wheezing, dizziness, visual disturbances, difficulty breathing if fumes are concentrated.
- **Ingestion:** May cause severe and permanent damage to mouth, throat and stomach.

**Notes to physician:** To the best of our knowledge, experiences about acute systemic health effects in human beings are not available. No specific antidote known. Symptomatic treatment.

4.2 **Symptoms of exposure:**
- **Eye contact:** Irritation and redness, watering, pain.
- **Skin contact:** Irritation, redness, itching.
- **Inhalation:** Coughing, wheezing, dizziness, visual disturbances, difficulty breathing if fumes are concentrated.
- **Ingestion:** May cause severe and permanent damage to mouth, throat and stomach.

**Notes to physician:** To the best of our knowledge, experiences about acute systemic health effects in human beings are not available. No specific antidote known. Symptomatic treatment.

5. Fire-Fighting Measures

5.1 **NFPA Flammable classification:** Combustible liquid IIIB
- **Flash point:** >200F

5.2 **Extinguishing Media**
- **Suitable:** Water fog, carbon dioxide, foam, dry chemical.
- **Not Suitable:** None

5.3 **Special hazards:** Combustion products may include: carbon oxides, nitrous gases and ammonia.

5.4 **Special protective actions for fire fighters:** Use protective fire fighting clothing and positive pressure self-contained breathing apparatus (SCBA) to protect against potential harmful and/or irritating fumes. Do not use high volume water jet as this may spread the area of the fire. Use water spray to cool unopened containers.

6. Accidental Release of Material

6.1 **Personal precautions:** Isolate area; keep unnecessary and unprotected personnel away from spill area. Avoid contact with skin, eyes and clothing. Use appropriate safety equipment. No health effects expected from the cleanup of this material if contact can be avoided.

6.2 **Environmental precautions:** Avoid disposal of spilled material and runoff and contact with soil, waterways, drains and sewers.

6.3 **Methods for cleaning up:** Contain and absorb large spills with an inert, non-flammable absorbent carrier (such as earth, sand or clay). Shovel into labeled open-top drums or plastic bags for further decontamination if necessary. Wash the spillage area clean with liquid decontaminant. (See section 13 for disposal considerations). Notify applicable government authorities if release is reportable.
7. Handling and storage
7.1 Precautions for safe handling: Avoid personal contact with the product. Use only with adequate ventilation to ensure that the occupational exposure limit is not exceeded. Regularly monitor the efficiency of the ventilation system. Avoid the formation and breathing of aerosols, mists and vapors. (See section 8 Exposure control for details). Keep stocks of de-contaminant readily available.
7.2 Storage: Keep containers tightly closed and store in a cool, dry well ventilated area.

8. Exposure controls/personal protection
8.1 Exposure parameters: None established.
8.2 Engineering controls: Ventilation through local exhaust if appropriate.
   Eye/face protection: Safety glasses, goggles, face mask as appropriate.
   Skin & hand protection: Protective clothing as necessary to guard against product contact. PVC, neoprene or nitrile rubber gloves.
   Respiratory protection: Not needed under normal use conditions under adequate ventilation.
   Other protective equipment: Eye wash stations and emergency showers should be available. The type and degree of personal protective equipment will depend on the specific work operation.
8.3 Environmental exposure controls: None established.

9. Physical and chemical properties
9.1 Information on basic physical and chemical properties.
   Appearance : Liquid
   Color : Red
   Type of odor : Ammonia or amine
   Vapor pressure : <0.1 mmHg @ 20 degrees C
   Vapor density : >1 (air=1)
   Boiling point : >200°C
   Flash point : >200°F
   pH : Alkaline
   Auto ignition temperature : N/D
   Specific gravity : 0.96-1.03 grams / cc
   Water solubility : Slight

10. Stability and reactivity
10.1 Reactivity: Reacts with strong acids and strong oxidizing agents.
10.2 Stability: Stable at room temperature.
10.3 Hazardous polymerization: Will not occur by itself. Masses of more than one pound of product plus an epoxy resin will cause irreversible polymerization with considerable heat build up.
10.4 Conditions to avoid: Keep away from heat and sources of ignition. Do not smoke.
10.5 Incompatible materials: Copper, copper alloys, organic absorbents (sawdust) ketones.
10.6 Hazardous decomposition products: Uncontrolled exothermic reaction with epoxy resin releases carbon monoxide, carbon dioxide, nitrogen compounds and ammonia.
SAFETY DATA SHEET

Anchor Seal, Inc.  EPOXY HARDENER

11. Toxicological information

11.1 Acute oral toxicity: LD50 (rat): >2,000 mg/kg.
   Acute dermal toxicity: LD50 (rabbit) >1,000 mg/kg, estimated
   Acute inhalation toxicity: No data.
   Skin irritation: Severe skin irritation, possible burns.
   Eye irritation: Severe eye irritation, corrosive, possible corneal injury and blindness.
   Product sensitization: May cause sensitization by skin contact.

12. Ecological Information

12.1 Toxicity to fish: Slightly toxic.
12.2 Toxicity to microorganisms: EC50; bacteria, static, 16 h: > 5,000 mg/l.
12.2 Persistence and biodegradability: Based on stringent OECD test guidelines, this material
cannot be considered as readily biodegradable; however these results do not mean that the material is
not biodegradable under environmental conditions.

13. Disposal considerations

13.1 Waste treatment methods: RCRA Hazard Class: D002 (Corrosive) Regulated under 40
CFR 261.22 as EPA Hazardous Waste based on its corrosive nature. Do not dump into any sewers, on
the ground, or into any body of water. Significant quantities of waste product residues should be
processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a
licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at
all times comply with the requirements of environmental protection and waste disposal legislation and
any regional local requirements. Incineration is the preferred method of disposal.
Container disposal: Drain container of all residual material prior to disposal.
SAFETY DATA SHEET

14. Transport information:
   14.1 DOT: Bulk and Non-Bulk
   UN/ID No: UN2735
   Proper Shipping name: Amines, liquid Corrosive, n.o.s.
   Technical Shipping Name: (Modified aliphatic amine)
   Class or Division: 8 PG III

14.2 IMDG Sea Transport:
   UN/ID No: UN2735
   Proper Shipping name: Amines, liquid corrosive, n.o.s.
   Technical Shipping Name: (Modified aliphatic amine)
   Class or Division: 8 PG III

14.3 IATA Air Transport:
   UN/ID No: UN2735
   Proper Shipping name: Amines, liquid corrosive, n.o.s.
   Technical Shipping Name: (Modified aliphatic amine)
   Class or Division: 8 PG III

15. Regulatory Information
   15.1 Safety health and environmental regulations/legislation:
   SARA Title III Section 311/312 (40CFR370): Immediate (acute) health hazard.
   SARA Title III Section 313 (40CFR372): No reportable components.
   SARA Title III: Section 304 - CERCLA (40CFR302): No reportable components.
   TSCA Inventory status: Section 8(b) All components are listed.
   TSCA Export notification: Section 12(b) No components listed.
   OSHA/NTP/IARC Carcinogen Status: Not listed.
   California Prop. 65: None
   Canadian DSL status: Reported/included.

16. Other Information
   HMIS/NFPA rating: Health: 3 Fire: 1 Reactivity: 0
   (Personal protective equipment selection is best assigned by the user after performing a hazard
   assessment on the product as it is to be used in the specific work process).
